★ Tennessee Sports Teams — Math on the Field! ★

- ★ **Tennessee Titans (NFL Football)** — Coaches use **statistics and percentages** to design plays. Titan Up fans use **addition and place value** to track every score and first down!
- ★ **Tennessee Volunteers (Football & Basketball)** — Rocky Top's legendary teams use **statistics, measurement, and data** to compete for SEC championships year after year.
- ★ **Memphis Grizzlies (NBA Basketball)** — Coaches and analysts use **decimals and data** to track player efficiency, points per game, and defensive ratings every night.
- ★ **Nashville Predators (NHL Hockey)** — One of the NHL's most passionate fan bases! Coaches use **data and fractions** to track save percentages and power play statistics.

The math skill? Master **data, decimals, statistics, and measurement** — think like a Tennessee sports champion!

★ Tennessee Careers — Your Math Future is Bright! ★

Tennessee needs math-smart people in every career!

- ★ **Energy Engineer (TVA) — Large numbers, fractions, and measurement** to manage hydroelectric dams and power plants delivering electricity to millions of homes.
- ★ **Music Industry Producer (Nashville) — Fractions, measurement, and decimals** to manage recording sessions, sound mixing, and music business contracts.
- ★ **Automotive Engineer (Volkswagen, Nissan plants) — Geometry, measurement, and decimals** to design and build vehicles at Tennessee's world-class manufacturing plants.
- ★ **Agricultural Scientist — Area, fractions, and data** to improve Tennessee's soybean, corn, and livestock farming.
- ★ **Doctor or Nurse (Vanderbilt Medical Center) — Fractions and decimals** to calculate medicine amounts at Tennessee's world-renowned hospitals.

★ The Skills in This Workbook Are Tennessee's Future! ★

Every worksheet you finish and every problem you solve is building the Tennessee that tomorrow needs. You are not just learning math — **you are becoming the engineer, the doctor, the coach, the scientist, or the leader** Tennessee is counting on!

Now let's dive in — Tennessee is rooting for you! ★

Ready to show what you know? Turn the page and let's get started. Every problem you solve brings you one step closer to an incredible future right here in the great state of Tennessee!

The Volunteer State needs ***math champions like you!***

Adding Multi-Digit Numbers

Add 24,587 + 38,645

	TTh	Th	H	T	O
	2^{1}	4^{1}	5	8^{1}	7
+	3	8	6	4	5
	6	3	2	3	2

Steps to Add

1. Add the **ones**: $7 + 5 = 12$
   Write 2, carry 1
2. Add the **tens**: $8 + 4 + 1 = 13$
   Write 3, carry 1
3. Add **hundreds**: $5 + 6 + 1 = 12$
   Write 2, carry 1
4. Continue left for all places

Answer: 24,587 + 38,645 = 63,232

✎ Practice Questions

Add.

1. 34,215 + 23,462 = _____

2. 56,789 + 28,345 = _____

3. 47,856 + 35,978 = _____

4. 128,450 + 64,375 = _____

5. 253,618 + 147,295 = _____

6. 485,237 + 314,586 = _____

Find the missing number.

7. 42,500 + _____ = 75,000

8. _____ + 135,800 = 250,000

9. 67,250 + _____ = 100,000

10. _____ + 289,400 = 500,000

Challenge!

11. A school district has three schools. Oak School has 12,345 students. Pine School has 9,876 students. Maple School has 15,432 students. How many students are there in all?

_____

"Digits need to stand in their own lanes! Line them up by place value so ones are with ones, tens with tens—no mixing! Then add from right to left, like reading the end of a story first."

Subtracting Multi-Digit Numbers

Subtract 52,413 − 28,675

	TTh	Th	H	T	O
	5	2	4	1	3
−	2	8	6	7	5
	2	3	7	3	8

Steps to Subtract

1. **Ones**: Can't do $3 - 5$ Regroup: $13 - 5 = 8$
2. **Tens**: Can't do $0 - 7$ Regroup: $10 - 7 = 3$
3. **Hundreds**: $3 - 6$? Regroup! $13 - 6 = 7$
4. Continue left for all places

Answer: 52,413 − 28,675 = 23,738

✎ Practice Questions

Subtract.

1. 67,842 − 34,521 = _____

2. 85,230 − 47,618 = _____

3. 43,005 − 18,267 = _____

4. 90,000 − 36,478 = _____

5. 172,500 − 89,375 = _____

6. 500,000 − 234,167 = _____

Find the missing number.

7. 80,000 − _____ = 45,250

8. _____ − 27,650 = 52,350

9. 150,000 − _____ = 68,425

10. _____ − 145,300 = 254,700

Challenge!

11. A city has 125,400 residents. During the year, 8,375 people moved away and 6,210 new people moved in. What is the new population? _____ residents

12. A warehouse had 500,000 boxes. It shipped 127,850 boxes in week 1 and 98,425 in week 2. Then it received 45,000 new boxes. How many boxes are in the warehouse now?

_____

"Top digit too small? Borrow from your left neighbor! Add 10 to the little guy, pay back 1 to the neighbor—it's like asking a friend for change. "Can I break a ten?" Yes, you can! Regroup and conquer!"

Place value! Scan now!

Estimating Sums and Differences

Estimating Sums

Estimate: $4{,}723 + 3{,}189$

Round to nearest 1,000:

$5{,}000 + 3{,}000 \approx \mathbf{8{,}000}$

Estimating Differences

Estimate: $8{,}412 - 2{,}678$

Round to nearest 1,000:

$8{,}000 - 3{,}000 \approx \mathbf{5{,}000}$

Steps: 1) Round each number 2) Add or subtract the rounded numbers

✎ Practice Questions

Estimate each sum by rounding to the nearest 1,000.

1. $3{,}412 + 5{,}287 \approx$ _____ **2.** $7{,}650 + 4{,}180 \approx$ _____ **3.** $12{,}345 + 8{,}712 \approx$ _____

Estimate each difference by rounding to the nearest 1,000.

4. $9{,}823 - 4{,}156 \approx$ _____ **5.** $15{,}480 - 7{,}320 \approx$ _____ **6.** $42{,}750 - 18{,}200 \approx$ _____

Estimate by rounding to the nearest 100.

7. $4{,}235 + 2{,}870 \approx$ _____ **8.** $6{,}518 - 2{,}467 \approx$ _____ **9.** $8{,}045 + 3{,}682 \approx$ _____

Estimate, then solve. Is your answer reasonable?

10. $6{,}475 + 3{,}218$

Estimate: _____ Exact: _____

11. $15{,}300 - 8{,}745$

Estimate: _____ Exact: _____

Challenge!

12. Ava has \$8,475. She wants to buy a laptop for \$3,289 and a printer for \$4,150. Estimate to see if she has enough, then find the exact total.

Estimate: _____ Exact: _____

13. A store's weekend sales were \$12,845 on Saturday and \$9,672 on Sunday. Estimate the total sales, then find the exact amount. Estimate: _____ Exact: _____

"Round first, then calculate—like a quick "ballpark" before the real game! If your exact answer is way off from your estimate, something's fishy. Time to double-check. Your estimate is your answer's best friend!"
