★ West Virginia Sports Teams — Math on the Field! ★

- ★ **West Virginia Mountaineers (Football & Basketball)** — WVU's passionate fans and coaches use **statistics, percentages, and data** to compete in the Big 12. Let's Go Mountaineers!
- ★ **West Virginia Power (Minor League Baseball, Charleston)** — Scorekeepers use **decimals and fractions** to track batting averages and pitching statistics all season long.
- ★ **White-Water Rafting (Gauley & New Rivers)** — Guides and race organizers use **measurement, elapsed time, and data** to run competitive kayak and rafting races on world-class rivers.
- ★ **Skiing (Snowshoe Mountain)** — West Virginia's top ski resort uses **measurement, decimals, and elapsed time** to track snowfall, groom trails, and time competitive ski races.

The math skill? Master **data, decimals, elapsed time, and measurement** — think like a West Virginia sports champion!

Keep trying! Scan here!

★ West Virginia Careers — Your Math Future is Bright! ★

West Virginia needs math-smart people in every career!

- ★ **Mining Engineer — Large numbers, measurement, and geometry** to safely design and operate West Virginia's coal and natural gas extraction operations.
- ★ **Radio Astronomer (Green Bank Observatory) — Extremely large numbers, geometry, and measurement** to explore the universe from the world's largest steerable radio telescope.
- ★ **Civil Engineer — Geometry, area, and measurement** to design West Virginia's bridges, tunnels, and highways through the challenging Appalachian terrain.
- ★ **Environmental Scientist — Data, decimals, and measurement** to protect West Virginia's rivers, forests, and the headwaters that supply clean water to the East Coast.
- ★ **Tourism Manager — Multiplication, data, and decimals** to welcome adventurers to the New River Gorge, white-water rivers, and fall foliage of Almost Heaven.

★ The Skills in This Workbook Are West Virginia's Future! ★

Every worksheet you finish and every problem you solve is building the West Virginia that tomorrow needs. You are not just learning math — **you are becoming the engineer, the doctor, the coach, the scientist, or the leader** West Virginia is counting on!

Now let's dive in — West Virginia is rooting for you! ★

Ready to show what you know? Turn the page and let's get started. Every problem you solve brings you one step closer to an incredible future right here in the great state of West Virginia!

The Mountain State needs ***math champions like you!***

Adding Multi-Digit Numbers

Add 24,587 + 38,645

	TTh	Th	H	T	O
	2^{1}	4^{1}	5	8^{1}	7
+	3	8	6	4	5
	6	3	2	3	2

Steps to Add

1. Add the **ones**: $7 + 5 = 12$
   Write 2, carry 1
2. Add the **tens**: $8 + 4 + 1 = 13$
   Write 3, carry 1
3. Add **hundreds**: $5 + 6 + 1 = 12$
   Write 2, carry 1
4. Continue left for all places

Answer: 24,587 + 38,645 = 63,232

Practice Questions

Add.

1. 34,215 + 23,462 = _____

2. 56,789 + 28,345 = _____

3. 47,856 + 35,978 = _____

4. 128,450 + 64,375 = _____

5. 253,618 + 147,295 = _____

6. 485,237 + 314,586 = _____

Find the missing number.

7. 42,500 + _____ = 75,000

8. _____ + 135,800 = 250,000

9. 67,250 + _____ = 100,000

10. _____ + 289,400 = 500,000

Challenge!

11. A school district has three schools. Oak School has 12,345 students. Pine School has 9,876 students. Maple School has 15,432 students. How many students are there in all?

_____

"Digits need to stand in their own lanes! Line them up by place value so ones are with ones, tens with tens—no mixing! Then add from right to left, like reading the end of a story first."

Subtracting Multi-Digit Numbers

Subtract 52,413 − 28,675

	TTh	Th	H	T	O
	5	2	4	1	3
−	2	8	6	7	5
	2	3	7	3	8

Steps to Subtract

1. **Ones**: Can't do $3 - 5$ Regroup: $13 - 5 = 8$
2. **Tens**: Can't do $0 - 7$ Regroup: $10 - 7 = 3$
3. **Hundreds**: $3 - 6$? Regroup! $13 - 6 = 7$
4. Continue left for all places

Answer: 52,413 − 28,675 = 23,738

✎ Practice Questions

Subtract.

1. 67,842 − 34,521 = _____

2. 85,230 − 47,618 = _____

3. 43,005 − 18,267 = _____

4. 90,000 − 36,478 = _____

5. 172,500 − 89,375 = _____

6. 500,000 − 234,167 = _____

Find the missing number.

7. 80,000 − _____ = 45,250

8. _____ − 27,650 = 52,350

9. 150,000 − _____ = 68,425

10. _____ − 145,300 = 254,700

Challenge!

11. A city has 125,400 residents. During the year, 8,375 people moved away and 6,210 new people moved in. What is the new population? _____ residents

12. A warehouse had 500,000 boxes. It shipped 127,850 boxes in week 1 and 98,425 in week 2. Then it received 45,000 new boxes. How many boxes are in the warehouse now?

_____

"Top digit too small? Borrow from your left neighbor! Add 10 to the little guy, pay back 1 to the neighbor—it's like asking a friend for change. "Can I break a ten?" Yes, you can! Regroup and conquer!"

Estimating Sums and Differences

Estimating Sums

Estimate: $4{,}723 + 3{,}189$

Round to nearest 1,000:

$5{,}000 + 3{,}000 \approx$ **8,000**

Estimating Differences

Estimate: $8{,}412 - 2{,}678$

Round to nearest 1,000:

$8{,}000 - 3{,}000 \approx$ **5,000**

Steps: 1) Round each number 2) Add or subtract the rounded numbers

✎ Practice Questions

Estimate each sum by rounding to the nearest 1,000.

1. $3{,}412 + 5{,}287 \approx$ _____ **2.** $7{,}650 + 4{,}180 \approx$ _____ **3.** $12{,}345 + 8{,}712 \approx$ _____

Estimate each difference by rounding to the nearest 1,000.

4. $9{,}823 - 4{,}156 \approx$ _____ **5.** $15{,}480 - 7{,}320 \approx$ _____ **6.** $42{,}750 - 18{,}200 \approx$ _____

Estimate by rounding to the nearest 100.

7. $4{,}235 + 2{,}870 \approx$ _____ **8.** $6{,}518 - 2{,}467 \approx$ _____ **9.** $8{,}045 + 3{,}682 \approx$ _____

Estimate, then solve. Is your answer reasonable?

10. $6{,}475 + 3{,}218$

Estimate: _____ Exact: _____

11. $15{,}300 - 8{,}745$

Estimate: _____ Exact: _____

Challenge!

12. Ava has \$8,475. She wants to buy a laptop for \$3,289 and a printer for \$4,150. Estimate to see if she has enough, then find the exact total.

Estimate: _____ Exact: _____

13. A store's weekend sales were \$12,845 on Saturday and \$9,672 on Sunday. Estimate the total sales, then find the exact amount. Estimate: _____ Exact: _____

"Round first, then calculate—like a quick "ballpark" before the real game! If your exact answer is way off from your estimate, something's fishy. Time to double-check. Your estimate is your answer's best friend!"
