★ Wyoming Sports Teams — Math on the Field! ★

- ★ **Wyoming Cowboys (Football & Basketball)** — The Pokes compete with heart in the Mountain West Conference! Coaches use **statistics, percentages, and data** to build competitive teams in Laramie.
- ★ **Professional Bull Riding (Cheyenne Frontier Days)** — Riders are scored using **decimals** on a 100-point scale, with judges awarding points to the nearest tenth of a point!
- ★ **Skiing & Snowboarding (Jackson Hole)** — Jackson Hole has the greatest vertical drop in the U.S. (4,139 feet)! Athletes use **elapsed time, decimals, and measurement** to race the mountain.
- ★ **Fly Fishing (Snake & Green Rivers)** — Wyoming's rivers are world-famous for fly fishing! Anglers use **measurement, data, and counting** to track catch-and-release numbers and river health.

The math skill? Master **decimals, elapsed time, data, and measurement** — think like a Wyoming sports champion!

★ Wyoming Careers — Your Math Future is Bright! ★

Wyoming needs math-smart people in every career!

- ★ **Geologist or Volcanologist — Large numbers, measurement, and data** to study Yellowstone's supervolcano, mineral deposits, and ancient rock formations.
- ★ **Energy Engineer (Coal, Gas, Wind) — Large numbers, fractions, and measurement** to safely extract the energy resources that power Wyoming and states across the nation.
- ★ **Cattle Rancher — Area, multiplication, and weight measurement** to manage herds across Wyoming's wide-open rangeland.
- ★ **Park Ranger (Yellowstone / Grand Teton) — Area, measurement, and data** to protect millions of acres of the world's most spectacular national parks.
- ★ **Wind Energy Technician — Geometry, measurement, and decimals** to maintain the wind turbines generating clean electricity across Wyoming's high plains and passes.

★ The Skills in This Workbook Are Wyoming's Future! ★

Every worksheet you finish and every problem you solve is building the Wyoming that tomorrow needs. You are not just learning math — **you are becoming the engineer, the doctor, the coach, the scientist, or the leader** Wyoming is counting on!

Now let's dive in — Wyoming is rooting for you! ★

Ready to show what you know? Turn the page and let's get started. Every problem you solve brings you one step closer to an incredible future right here in the great state of Wyoming!

The Cowboy State needs ***math champions like you!***

Adding Multi-Digit Numbers

Add 24,587 + 38,645

	TTh	Th	H	T	O
	2^{1}	4^{1}	5	8^{1}	7
+	3	8	6	4	5
	6	3	2	3	2

Steps to Add

1. Add the **ones**: $7 + 5 = 12$
   Write 2, carry 1
2. Add the **tens**: $8 + 4 + 1 = 13$
   Write 3, carry 1
3. Add **hundreds**: $5 + 6 + 1 = 12$
   Write 2, carry 1
4. Continue left for all places

Answer: 24,587 + 38,645 = 63,232

✎ Practice Questions

Add.

1. 34,215 + 23,462 = _____

2. 56,789 + 28,345 = _____

3. 47,856 + 35,978 = _____

4. 128,450 + 64,375 = _____

5. 253,618 + 147,295 = _____

6. 485,237 + 314,586 = _____

Find the missing number.

7. 42,500 + _____ = 75,000

8. _____ + 135,800 = 250,000

9. 67,250 + _____ = 100,000

10. _____ + 289,400 = 500,000

Challenge!

11. A school district has three schools. Oak School has 12,345 students. Pine School has 9,876 students. Maple School has 15,432 students. How many students are there in all?

_____

"Digits need to stand in their own lanes! Line them up by place value so ones are with ones, tens with tens—no mixing! Then add from right to left, like reading the end of a story first."

Subtracting Multi-Digit Numbers

Subtract 52,413 − 28,675

	TTh	Th	H	T	O
	5	2	4	1	3
−	2	8	6	7	5
	2	3	7	3	8

Steps to Subtract

1. **Ones**: Can't do $3 - 5$ Regroup: $13 - 5 = 8$
2. **Tens**: Can't do $0 - 7$ Regroup: $10 - 7 = 3$
3. **Hundreds**: $3 - 6$? Regroup! $13 - 6 = 7$
4. Continue left for all places

Answer: 52,413 − 28,675 = 23,738

✎ Practice Questions

Subtract.

1. 67,842 − 34,521 = _____

2. 85,230 − 47,618 = _____

3. 43,005 − 18,267 = _____

4. 90,000 − 36,478 = _____

5. 172,500 − 89,375 = _____

6. 500,000 − 234,167 = _____

Find the missing number.

7. 80,000 − _____ = 45,250

8. _____ − 27,650 = 52,350

9. 150,000 − _____ = 68,425

10. _____ − 145,300 = 254,700

Challenge!

11. A city has 125,400 residents. During the year, 8,375 people moved away and 6,210 new people moved in. What is the new population? _____ residents

12. A warehouse had 500,000 boxes. It shipped 127,850 boxes in week 1 and 98,425 in week 2. Then it received 45,000 new boxes. How many boxes are in the warehouse now?

_____

"Top digit too small? Borrow from your left neighbor! Add 10 to the little guy, pay back 1 to the neighbor—it's like asking a friend for change. "Can I break a ten?" Yes, you can! Regroup and conquer!"

Estimating Sums and Differences

Estimating Sums

Estimate: $4{,}723 + 3{,}189$

Round to nearest 1,000:

$5{,}000 + 3{,}000 \approx$ **8,000**

Estimating Differences

Estimate: $8{,}412 - 2{,}678$

Round to nearest 1,000:

$8{,}000 - 3{,}000 \approx$ **5,000**

Steps: 1) Round each number 2) Add or subtract the rounded numbers

✎ Practice Questions

Estimate each sum by rounding to the nearest 1,000.

1. $3{,}412 + 5{,}287 \approx$ _____ **2.** $7{,}650 + 4{,}180 \approx$ _____ **3.** $12{,}345 + 8{,}712 \approx$ _____

Estimate each difference by rounding to the nearest 1,000.

4. $9{,}823 - 4{,}156 \approx$ _____ **5.** $15{,}480 - 7{,}320 \approx$ _____ **6.** $42{,}750 - 18{,}200 \approx$ _____

Estimate by rounding to the nearest 100.

7. $4{,}235 + 2{,}870 \approx$ _____ **8.** $6{,}518 - 2{,}467 \approx$ _____ **9.** $8{,}045 + 3{,}682 \approx$ _____

Estimate, then solve. Is your answer reasonable?

10. $6{,}475 + 3{,}218$

Estimate: _____ Exact: _____

11. $15{,}300 - 8{,}745$

Estimate: _____ Exact: _____

Challenge!

12. Ava has \$8,475. She wants to buy a laptop for \$3,289 and a printer for \$4,150. Estimate to see if she has enough, then find the exact total.

Estimate: _____ Exact: _____

13. A store's weekend sales were \$12,845 on Saturday and \$9,672 on Sunday. Estimate the total sales, then find the exact amount. Estimate: _____ Exact: _____

"Round first, then calculate—like a quick "ballpark" before the real game! If your exact answer is way off from your estimate, something's fishy. Time to double-check. Your estimate is your answer's best friend!"
