1) As it is used in paragraph 4, what does the word *restore* most nearly mean?

(A) to replace a task with a computer
(B) to hide something from public view
(C) to bring something back to an earlier or improved condition
(D) to explain why two things differ

Use the article "Restoring the Painted Wall" to answer this question.

2) Which statement best expresses the central idea of the article?

(A) The article mostly explains the team's daily routines and gives only brief attention to how the project adjusted over time.
(B) The article describes a community effort whose success depended more on a single decisive moment than on the broader pattern of testing and revision.
(C) The article focuses on the project's final outcome and suggests that earlier setbacks had little effect on what the team eventually achieved.
(D) Careful research and revision helped a mural restoration project become a useful community project.

Use the article "Restoring the Painted Wall" to answer this question.

3) Which detail best supports the idea that the team improved the project by studying a problem carefully?

(A) The finished project later provided a useful result for the community.
(B) The project began after students identified a local need in the community.
(C) Students and volunteers worked together throughout the project.
(D) The team studied the weakness and then interviewed the original artist and mixed new colors based on archived images.

Use the article "Restoring the Painted Wall" to answer this question.

4) How does paragraph 3 contribute to the structure of the article?

(A) It compares two unrelated projects in different locations.
(B) It presents the setback that leads to the revision described later.
(C) It summarizes the article's conclusion before any evidence is given.
(D) It introduces the setting of the project for the first time.

Use the article "Restoring the Painted Wall" to answer this question.

5) Why does the author include details about the team's routines in paragraph 2?

(A) To foreshadow that the project will face a challenge later
(B) To emphasize how much time and effort the project required
(C) To show that the project depends on repeated steps and collected evidence
(D) To show that the team worked in an orderly way from the beginning

Use the article "Restoring the Painted Wall" to answer this question.

6) Which sentence best explains how the article develops the topic?

(A) It describes two different community problems and explains how each was solved by a different team.
(B) It compares two competing approaches to solving the problem and argues that one is clearly better.
(C) It introduces a project, explains its process, describes a problem, and shows a revised solution.
(D) It presents the final result first and then goes back to explain how the project originally started.

Use the article "Restoring the Painted Wall" to answer this question.

7) What can the reader most reasonably infer about the team members?

(A) They set strict deadlines and follow them even when observations suggest a different path.
(B) They are willing to revise their work when the evidence shows a problem.
(C) They respect careful work but usually wait for an outside expert before changing their plan.
(D) They treat each setback as proof that the original idea was wrong and start over from the beginning.

Use the article "Restoring the Painted Wall" to answer this question.

8) Which option is the best summary of the article?

(A) A community project started strongly, met no serious difficulty, and ended with a steady result.
(B) A community project ran into trouble, moved on without changing its plan, and still produced a useful outcome.
(C) A community project faced a challenge, improved through research and revision, and eventually produced a useful result.
(D) A community project spent most of its time planning, finished one stage, and left the main problem for another group.

Read the story and the poem. Then answer questions 9–16.

Use the article "Robots in the Operating Room" to answer this question.

22) **This question has two correct answers.** Choose the **two** sentences from the article that **together** best support the idea that robotic-assisted surgery offers real benefits but also has real limits.

(A) "These machines do not replace the doctor; instead, they act like precise extensions of the surgeon's arms."
(B) "Smaller cuts often mean less bleeding, shorter hospital stays, and faster recoveries."
(C) "In a typical robotic-assisted surgery, the doctor sits at a console a short distance from the patient."
(D) "Rural hospitals often cannot afford the systems, which raises fair concerns about who gets access."
(E) "The hope is that in the next decade robotic assistance will be available in far more hospitals, not just a privileged few."

Use the article "Robots in the Operating Room" to answer this question.

23) Which sentence would be the **best** summary of the article?

(A) Surgical robots are new and have no clear benefits yet.
(B) Robotic-assisted surgery extends what surgeons can do, offering smaller cuts and steadier motion, while raising fair questions about cost and access.
(C) Surgical robots are useful only for training students.
(D) Robotic surgery is mainly important because it is less expensive than older methods.

Read the selection and choose the best answer to each question.

Jordan wrote an informational essay about the benefits of outdoor learning. Read Jordan's essay and look for revisions he needs to make. Then answer the questions that follow.

Why Classes Should Go Outside

(1) Moving a class outside changes more than the view. (2) Research shows that students who spend part of each week in outdoor lessons often feel calmer and remember more. (3) Fresh air and natural light seem to support attention in ways that fluorescent bulbs cannot. (4) My brother just learned how to repair a bicycle tire.

(5) Outdoor learning fits many subjects. (6) Math classes measure shadows and chart weather patterns; science classes observe insects in real habitats; writing classes record images in notebooks before drafting.

(7) Challenges exist, of course. (8) Teachers need equipment, schedules, and a plan for bad weather. (9) Still, schools that have made outdoor lessons a regular part of the week often describe students as more engaged and less restless when they return to the classroom.

24) Which sentence should Jordan remove from the **first** paragraph because it does not support the main idea?

(A) Sentence 1
(B) Sentence 2
(C) Sentence 3
(D) Sentence 4

Use the essay "Why Classes Should Go Outside" to answer this question.

25) What is the **best** way to combine sentences 5 and 6?

(A) Outdoor learning fits many subjects: math classes measure shadows and chart weather patterns, science classes observe insects in real habitats, and writing classes record images in notebooks before drafting.
(B) Outdoor learning fits subjects; classes do things.
(C) Subjects fit outside, and students measure things.
(D) Learning happens everywhere, and classes are fun.

Use the essay "Why Classes Should Go Outside" to answer this question.

26) Jordan wants to add a transition at the beginning of paragraph 3. Which sentence would **best** serve this purpose?

(A) For example, math and science can both move outdoors.
(B) Nevertheless, taking classes outside takes planning and flexibility.
(C) In addition, many students enjoy lunch under the trees.
(D) As a result, every school should cancel indoor lessons completely.

Use the essay "Why Classes Should Go Outside" to answer this question.

27) Which sentence would be the **best** closing sentence for Jordan's essay?

(A) There are many other topics that schools could explore next year.
(B) With careful planning and steady support, outdoor lessons can become a regular and welcome part of the school week.
(C) Some students like to have pizza for lunch on Fridays.
(D) Teachers sometimes travel during the summer to other states.
