1) As it is used in paragraph 4, what does the word *efficient* most nearly mean?

(A) able to store large amounts of water for long periods
(B) carefully arranged to look neat from a distance
(C) requiring extra time and materials to do the same job
(D) working well without wasting time or materials

Use the article "Capturing Water from Fog" to answer this question.

2) Which statement best expresses the central idea of the article?

(A) The article mostly explains the team's daily routines and gives only brief attention to how the project adjusted over time.
(B) The article describes a community effort whose success depended more on a single decisive moment than on the broader pattern of testing and revision.
(C) The article focuses on the project's final outcome and suggests that earlier setbacks had little effect on what the team eventually achieved.
(D) Careful research and revision helped a hillside fog-catcher experiment become a useful community project.

Use the article "Capturing Water from Fog" to answer this question.

3) Which detail best supports the idea that the team improved the project by studying a problem carefully?

(A) The finished project later provided a useful result for the community.
(B) The team studied the weakness and then rinsed the nets weekly and angled the frames so the runoff moved more quickly.
(C) Students and volunteers worked together throughout the project.
(D) The project began after students identified a local need in the community.

Scan Me

Use the article "Capturing Water from Fog" to answer this question.

4) How does paragraph 3 contribute to the structure of the article?

(A) It compares two unrelated projects in different locations.
(B) It introduces the setting of the project for the first time.
(C) It presents the setback that leads to the revision described later.
(D) It summarizes the article's conclusion before any evidence is given.

Use the article "Capturing Water from Fog" to answer this question.

5) Why does the author include details about the team's routines in paragraph 2?

(A) To emphasize how much time and effort the project required
(B) To foreshadow that the project will face a challenge later
(C) To show that the project depends on repeated steps and collected evidence
(D) To show that the team worked in an orderly way from the beginning

Use the article "Capturing Water from Fog" to answer this question.

6) Which sentence best explains how the article develops the topic?

(A) It describes two different community problems and explains how each was solved by a different team.
(B) It presents the final result first and then goes back to explain how the project originally started.
(C) It compares two competing approaches to solving the problem and argues that one is clearly better.
(D) It introduces a project, explains its process, describes a problem, and shows a revised solution.

Use the article "Capturing Water from Fog" to answer this question.

7) What can the reader most reasonably infer about the team members?

(A) They set strict deadlines and follow them even when observations suggest a different path.
(B) They respect careful work but usually wait for an outside expert before changing their plan.
(C) They are willing to revise their work when the evidence shows a problem.
(D) They treat each setback as proof that the original idea was wrong and start over from the beginning.

Use the article "Capturing Water from Fog" to answer this question.

8) Which option is the best summary of the article?

(A) A community project faced a challenge, improved through research and revision, and eventually produced a useful result.
(B) A community project started strongly, met no serious difficulty, and ended with a steady result.
(C) A community project ran into trouble, moved on without changing its plan, and still produced a useful outcome.
(D) A community project spent most of its time planning, finished one stage, and left the main problem for another group.

Read the story and the poem. Then answer questions 9–16.

Use the article "Robots in the Operating Room" to answer this question.

22) **This question has two correct answers.** Choose the **two** sentences from the article that **together** best support the idea that robotic-assisted surgery offers real benefits but also has real limits.

(A) "These machines do not replace the doctor; instead, they act like precise extensions of the surgeon's arms."
(B) "Smaller cuts often mean less bleeding, shorter hospital stays, and faster recoveries."
(C) "In a typical robotic-assisted surgery, the doctor sits at a console a short distance from the patient."
(D) "Rural hospitals often cannot afford the systems, which raises fair concerns about who gets access."
(E) "The hope is that in the next decade robotic assistance will be available in far more hospitals, not just a privileged few."

Use the article "Robots in the Operating Room" to answer this question.

23) Which sentence would be the **best** summary of the article?

(A) Surgical robots are new and have no clear benefits yet.
(B) Robotic-assisted surgery extends what surgeons can do, offering smaller cuts and steadier motion, while raising fair questions about cost and access.
(C) Surgical robots are useful only for training students.
(D) Robotic surgery is mainly important because it is less expensive than older methods.

Read the selection and choose the best answer to each question.

Priya wrote an informational essay about the importance of sleep for middle school students. Read Priya's essay and look for revisions she needs to make. Then answer the questions that follow.

Middle Schoolers Need Better Sleep

(1) Most middle school students need nine to eleven hours of sleep each night. (2) Doctors say that sleep helps the brain move new information into long-term memory. (3) Sleep also supports attention, mood, and healthy growth. (4) My little brother lines up his soccer cleats by the door every night.

(5) Unfortunately, many students do not get enough rest. (6) Homework, sports, and screens all compete for evening time. (7) Some students stay up past midnight and then drag themselves through first period the next morning.

(8) Small changes can help. (9) Leaving phones outside the bedroom, turning off bright lights an hour before bed, and keeping weekend and weekday schedules close together all make a real difference. (10) With steady routines, students often find that mornings become easier and classes feel less blurry.

24) Which sentence should Priya remove from the **first** paragraph because it does not support the main idea?

(A) Sentence 1
(B) Sentence 2
(C) Sentence 3
(D) Sentence 4

Use the essay "Middle Schoolers Need Better Sleep" to answer this question.

25) What is the **best** way to combine sentences 5 and 6?

(A) Unfortunately, many students do not get enough rest because homework, sports, and screens all compete for evening time.
(B) Students do not sleep well, and homework is hard.
(C) Rest is missed; evenings are busy.
(D) Many students skip dinner and go to bed late because of screens.

Use the essay "Middle Schoolers Need Better Sleep" to answer this question.

26) Priya wants to add a transition at the beginning of paragraph 3. Which sentence would **best** serve this purpose?

(A) Fortunately, small changes can make a big difference.
(B) For example, many students drag themselves through first period after a late night.
(C) In the same way, phones and bright lights often fill the evening hours.
(D) As a result, every student should follow exactly the same bedtime.

Use the essay "Middle Schoolers Need Better Sleep" to answer this question.

27) Which sentence would be the **best** closing sentence for Priya's essay?

(A) Many people like late-night television shows on the weekend.
(B) With better routines and fewer late-night distractions, middle schoolers can claim the steady sleep they need to learn and grow.
(C) Sleep is sometimes discussed at the doctor's office.
(D) People live in many different kinds of houses.
