Description

The goal of this book is simple. It will help you incorporate the most effective method and the right strategies to prepare for the SAT Math test quickly and effectively.

Ace the SAT Math in 30 Days, which reflects the 2019 test guidelines and topics, is designed to help you hone your math skills, overcome your exam anxiety, and boost your confidence -- and do your best to defeat SAT Math Test. This SAT Math new edition has been updated to replicate questions appearing on the most recent SAT Math tests. This is a precious learning tool for SAT Math test takers who need extra practice in math to improve their SAT Math score. After reviewing this book, you will have solid foundation and adequate practice that is necessary to ace the SAT Math test. **This book is your ticket to ace the SAT Math!**

Ace the SAT Math in 30 Days provides students with the confidence and math skills they need to succeed on the SAT Math, providing a solid foundation of basic Math topics with abundant exercises for each topic. It is designed to address the needs of SAT test takers who must have a working knowledge of basic Math.

Inside the pages of this comprehensive book, students can learn math topics in a structured manner with a complete study program to help them understand essential math skills. It also has many exciting features, including:

- Content 100% aligned with the 2019 SAT test
- Written by SAT Math tutors and test experts
- Complete coverage of all SAT Math concepts and topics which you will be tested
- Step-by-step guide for all SAT Math topics
- Dynamic design and easy-to-follow activities
- Over 2,500 additional SAT math practice questions in both multiple-choice and grid-in formats with answers grouped by topic, so you can focus on your weak areas
- Abundant Math skill building exercises to help test-takers approach different question types that might be unfamiliar to them
- Exercises on different SAT Math topics such as integers, percent, equations, polynomials, exponents and radicals
- 2 full-length practice tests (featuring new question types) with detailed answers

Effortlessly and confidently follow the step-by-step instructions in this book to ace the SAT Math in a short period of time.

ACT Math in 30 Days **is the only book you'll ever need to master Basic Math topics!** It can be used as a self-study course - you do not need to work with a Math tutor. (It can also be used with a Math tutor).

You'll be surprised how fast you master the Math topics covering on SAT Math Test.

Ideal for self-study as well as for classroom usage.

About the Author

Reza Nazari is the author of more than 100 Math learning books including:
– Math and Critical Thinking Challenges: For the Middle and High School Student
– GRE Math in 30 Days
– ASVAB Math Workbook 2018 - 2019
– Effortless Math Education Workbooks
– and many more Mathematics books …

Reza is also an experienced Math instructor and a test–prep expert who has been tutoring students since 2008. Reza is the founder of Effortless Math Education, a tutoring company that has helped many students raise their standardized test scores—and attend the colleges of their dreams. Reza provides an individualized custom learning plan and the personalized attention that makes a difference in how students view math.

Contents

Day 1: Fractions 12
Simplifying Fractions 13
Adding and Subtracting Fractions 14
Multiplying and Dividing Fractions 15
Answers of Worksheets – Day 1 16
Day 2: Mixed Numbers 17
Adding Mixed Numbers 18
Subtract Mixed Numbers 19
Multiplying Mixed Numbers 20
Dividing Mixed Numbers 21
Answers of Worksheets – Day 2 22
Day 3: Decimals 23
Comparing Decimals 24
Rounding Decimals 25
Adding and Subtracting Decimals 26
Multiplying and Dividing Decimals 27
Answers of Worksheets – Day 3 28
Day 4: Factoring Numbers 29
Factoring Numbers 30
Greatest Common Factor 31
Least Common Multiple 32
Adding and Subtracting Integers 33
Answers of Worksheets – Day 4 34
Day 5: Order of Operations and Absolute Value 35
Multiplying and Dividing Integers 36
Ordering Integers and Numbers 37
Order of Operations 38
Integers and Absolute Value 39
Answers of Worksheets – Day 5 40
Day 6: Ratios and Proportions 41
Simplifying Ratios 42

Proportional Ratios 43
Create a Proportion 44
Similarity and Ratios 45
Answers of Worksheets – Day 6 46
Day 7: Percent 47
Percentage Calculations 48
Percent Problems 49
Percent of Increase and Decrease 50
Simple Interest 51
Answers of Worksheets – Day 7 52
Day 8: Percentage and Expressions 53
Discount, Tax and Tip 54
Variable Expressions 55
Simplifying Polynomial Expressions 56
Translate Phrases into an Algebraic Statement 57
Answers of Worksheets – Day 8 58
Day 9: Evaluating Variables 59
The Distributive Property 60
Evaluating One Variable 61
Evaluating Two Variables 62
Combining like Terms 63
Answers of Worksheets – Day 9 64
Day 10: Equations 65
One–Step Equations 66
Multi–Step Equations 67
Answers of Worksheets – Day 10 68
Day 11: Inequalities 69
Graphing Single–Variable Inequalities 70
One–Step Inequalities 71
Multi–Step Inequalities 72
Answers of Worksheets – Day 11 73
Day 12: Linear Equations 75

Finding Slope 76
Graphing Lines Using Slope–Intercept Form 77
Graphing Lines Using Standard Form 78
Writing Linear Equations 79
Answers of Worksheets – Day 12 80
Day 13: Linear Inequalities, Midpoint and Distance 82
Graphing Linear Inequalities 83
Finding Midpoint 84
Finding Distance of Two Points 85
Answers of Worksheets – Day 13 86
Day 14: Monomials and Polynomials 88
Writing Polynomials in Standard Form 89
Simplifying Polynomials 90
Adding and Subtracting Polynomials 91
Multiplying Monomials 92
Multiplying and Dividing Monomials 93
Answers of Worksheets – Day 14 94
Day 15: Monomials and Polynomials Operations 96
Multiplying a Polynomial and a Monomial 97
Multiplying Binomials 98
Factoring Trinomials 99
Operations with Polynomials 100
Answers of Worksheets – Day 15 101
Day 16: System of Equations 102
Systems of Equations 103
Systems of Equations Word Problems 104
Answers of Worksheets – Day 16 105
Day 17: Quadratic 106
Solving a Quadratic Equation 107
Graphing Quadratic Functions 108
Answers of Worksheets – Day 17 109
Day 18: Quadratic Inequalities 110

Solving Quadratic Inequalities 111
Graphing Quadratic inequalities 112
Answers of Worksheets – Day 18 113
Day 19: Complex Numbers 114
Adding and subtracting complex numbers 115
Multiplying and dividing complex numbers 116
Rationalizing Imaginary Denominators 117
Answers of Worksheets – Day 19 118
Day 20: Exponents 119
Multiplication Property of Exponents 120
Division Property of Exponents 121
Powers of Products and Quotients 122
Zero and Negative Exponents 123
Answers of Worksheets – Day 20 124
Day 21: Exponents and Radicals 126
Negative Exponents and Negative Bases 127
Scientific Notation 128
Square Roots 129
Answers of Worksheets – Day 21 130
Day 22: Functions 131
Function Notation 132
Adding and Subtracting Functions 133
Multiplying and Dividing Functions 134
Composition of Functions 135
Answers of Worksheets – Day 22 136
Day 23: Triangles, polygons, and Circles 137
The Pythagorean Theorem 138
Triangles 139
Polygons 140
Circles 141
Answers of Worksheets – Day 23 142
Day 24: Volume and Surface Area 144

Trapezoids 145
Cubes 146
Rectangular Prisms 147
Cylinder 148
Answers of Worksheets – Day 24 149
Day 25: Statistics and Probability 150
Mean, Median, Mode, and Range of the Given Data 151
Histograms 152
Pie Graph 153
Probability Problems 154
Permutations and Combinations 155
Answers of Worksheets – Day 25 156
Day 26: Trigonometric Functions Section 1 157
Trig Ratios of General Angles 158
Conterminal Angles and Reference Angles 159
Angles and Angle Measure 160
Answers of Worksheets – Day 26 161
Day 27: Trigonometric Functions Section 2 162
Evaluating Trigonometric Function 163
Missing Sides and Angles of a Right Triangle 164
Arc length and Sector Area 165
Answers of Worksheets – Day 27 166
Day 28: Sequences and Series 167
Arithmetic Sequences 168
Geometric Sequences 169
Finite Geometric Series 170
Infinite Geometric Series 171
Answers of Worksheets – Day 28 172
Day 29: Time to Test 173
SAT Math Practice Test 2019 175
SAT Math Practice Test Answers and Explanations 201
Day 30: A Realistic SAT Math Test 216

SAT Math Practice Test 2019 217

SAT Math Practice Test Answers and Explanations 244

Day 1: Fractions

Math Topics that you'll learn today:

- ✓ Simplifying Fractions
- ✓ Adding and Subtracting Fractions
- ✓ Multiplying and Dividing Fractions

"A Man is like a fraction whose numerator is what he is and whose denominator is what he thinks of himself. The larger the denominator, the smaller the fraction." -Tolstoy

Simplifying Fractions

Step-by-step guide:

- ✓ Evenly divide both the top and bottom of the fraction by $2, 3, 5, 7$, … etc.
- ✓ Continue until you can't go any further.

Examples:

1) Simplify $\frac{12}{20}$.

To simplify $\frac{12}{20}$, find a number that both 12 and 20 are divisible by. Both are divisible by 4. Then: $\frac{12}{20} = \frac{12 \div 4}{20 \div 4} = \frac{3}{5}$

2) Simplify $\frac{64}{80}$.

To simplify $\frac{64}{80}$, find a number that both 64 and 80 are divisible by. Both are divisible by 8 and 16. Then: $\frac{64}{80} = \frac{64 \div 8}{80 \div 8} = \frac{8}{10}$, 8 and 10 are divisible by 2, then: $\frac{8}{10} = \frac{4}{5}$

or $\frac{64}{80} = \frac{64 \div 16}{80 \div 16} = \frac{4}{5}$

Simplify each fraction.

1) $\frac{9}{18} =$

2) $\frac{8}{10} =$

3) $\frac{6}{8} =$

4) $\frac{5}{20} =$

5) $\frac{18}{24} =$

6) $\frac{6}{9} =$

7) $\frac{12}{15} =$

8) $\frac{4}{16} =$

9) $\frac{18}{36} =$

10) $\frac{6}{42} =$

11) $\frac{13}{39} =$

12) $\frac{21}{28} =$

Adding and Subtracting Fractions

Step-by-step guide:

- ✓ For "like" fractions (fractions with the same denominator), add or subtract the numerators and write the answer over the common denominator.
- ✓ Find equivalent fractions with the same denominator before you can add or subtract fractions with different denominators.
- ✓ Adding and Subtracting with the same denominator:
  $\frac{a}{b}+\frac{c}{b}=\frac{a+c}{b}$, $\frac{a}{b}-\frac{c}{b}=\frac{a-c}{b}$
- ✓ Adding and Subtracting fractions with different denominators:
  $\frac{a}{b}+\frac{c}{d}=\frac{ad+c}{bd}$, $\frac{a}{b}-\frac{c}{d}=\frac{ad-cb}{bd}$

Examples:

1) Subtract fractions. $\frac{4}{5}-\frac{3}{5}=$

   For "like" fractions, subtract the numerators and write the answer over the common denominator. then: $\frac{4}{5}-\frac{3}{5}=\frac{1}{5}$

2) Subtract fractions. $\frac{2}{3}-\frac{1}{2}=$

   For "unlike" fractions, find equivalent fractions with the same denominator before you can add or subtract fractions with different denominators. Use this formula: $\frac{a}{b}-\frac{c}{d}=\frac{ad-cb}{bd}$

   $\frac{2}{3}-\frac{1}{2}=\frac{(2)(2)-(1)(3)}{3\times 2}=\frac{4-3}{6}=\frac{1}{6}$

Find the sum or difference.

1) $\frac{1}{3}+\frac{2}{3}=$
2) $\frac{1}{2}+\frac{1}{3}=$
3) $\frac{2}{5}+\frac{1}{2}=$
4) $\frac{3}{7}+\frac{2}{3}=$
5) $\frac{1}{2}-\frac{1}{3}=$
6) $\frac{4}{5}-\frac{2}{3}=$
7) $\frac{2}{3}-\frac{1}{6}=$
8) $\frac{3}{5}-\frac{1}{2}=$
9) $\frac{8}{9}-\frac{2}{5}=$

Multiplying and Dividing Fractions

Step-by-step guide:

- ✓ Multiplying fractions: multiply the top numbers and multiply the bottom numbers.
- ✓ Dividing fractions: Keep, Change, Flip
- ✓ Keep first fraction, change division sign to multiplication, and flip the numerator and denominator of the second fraction. Then, solve!

Examples:

1) Multiplying fractions. $\frac{5}{6} \times \frac{3}{4} =$

Multiply the top numbers and multiply the bottom numbers.
$\frac{5}{6} \times \frac{3}{4} = \frac{5\times3}{6\times4} = \frac{15}{24}$, simplify: $\frac{15}{24} = \frac{15\div3}{24\div3} = \frac{5}{8}$

2) Dividing fractions. $\frac{1}{4} \div \frac{2}{3} =$

Keep first fraction, change division sign to multiplication, and flip the numerator and denominator of the second fraction. Then: $\frac{1}{4} \times \frac{3}{2} = \frac{1\times3}{4\times2} = \frac{3}{8}$

Find the answers.

1) $\frac{1}{2} \times \frac{3}{4} =$

2) $\frac{3}{5} \times \frac{2}{3} =$

3) $\frac{1}{4} \times \frac{2}{5} =$

4) $\frac{1}{6} \times \frac{4}{5} =$

5) $\frac{1}{5} \times \frac{1}{4} =$

6) $\frac{2}{5} \times \frac{1}{2} =$

7) $\frac{1}{2} \div \frac{1}{4} =$

8) $\frac{1}{3} \div \frac{1}{2} =$

9) $\frac{2}{5} \div \frac{1}{3} =$

10) $\frac{1}{4} \div \frac{2}{3} =$

11) $\frac{1}{5} \div \frac{3}{10} =$

12) $\frac{2}{7} \div \frac{1}{3} =$

Answers of Worksheets – Day 1

Simplifying Fractions

1) $\frac{1}{2}$
2) $\frac{4}{5}$
3) $\frac{3}{4}$
4) $\frac{1}{4}$
5) $\frac{3}{4}$
6) $\frac{2}{3}$
7) $\frac{4}{5}$
8) $\frac{1}{4}$
9) $\frac{1}{2}$
10) $\frac{1}{7}$
11) $\frac{1}{3}$
12) $\frac{3}{4}$

Adding and Subtracting Fractions

1) $\frac{3}{3} = 1$
2) $\frac{5}{6}$
3) $\frac{9}{10}$
4) $\frac{23}{21}$
5) $\frac{1}{6}$
6) $\frac{2}{15}$
7) $\frac{1}{2}$
8) $\frac{1}{10}$
9) $\frac{22}{45}$

Multiplying and Dividing Fractions

1) $\frac{3}{8}$
2) $\frac{2}{5}$
3) $\frac{1}{10}$
4) $\frac{2}{15}$
5) $\frac{1}{20}$
6) $\frac{1}{5}$
7) 2
8) $\frac{2}{3}$
9) $\frac{6}{5}$
10) $\frac{3}{8}$
11) $\frac{2}{3}$
12) $\frac{6}{7}$

Day 2:

Mixed Numbers

Math Topics that you'll learn today:

- ✓ Adding Mixed Numbers
- ✓ Subtracting Mixed Numbers
- ✓ Multiplying Mixed Numbers
- ✓ Dividing Mixed Numbers

Mathematics is an art of human understanding. ~ William Thurston

Adding Mixed Numbers

Step-by-step guide:

Use the following steps for both adding and subtracting mixed numbers.

- ✓ Add whole numbers of the mixed numbers.
- ✓ Add the fractions of each mixed number.
- ✓ Find the Least Common Denominator (LCD) if necessary.
- ✓ Add whole numbers and fractions.
- ✓ Write your answer in lowest terms.

Examples:

1) Add mixed numbers. $1\frac{3}{4}+2\frac{3}{8}=$

Rewriting our equation with parts separated, $1+\frac{3}{4}+2+\frac{3}{8}$, Solving the whole number parts $1+2=3$, Solving the fraction parts $\frac{3}{4}+\frac{3}{8}$, and rewrite to solve with the equivalent fractions.

$\frac{6}{8}+\frac{3}{8}=\frac{9}{8}=1\frac{1}{8}$, then Combining the whole and fraction parts $3+1+\frac{1}{8}=4\frac{1}{8}$

2) Add mixed numbers. $1\frac{2}{3}+4\frac{1}{6}=$

Rewriting our equation with parts separated, $1+\frac{2}{3}+4+\frac{1}{6}$, Solving the whole number parts $1+4=5$, Solving the fraction parts $\frac{2}{3}+\frac{1}{6}$, and rewrite to solve with the equivalent fractions.

$\frac{2}{3}+\frac{1}{6}=\frac{5}{6}$, then Combining the whole and fraction parts $5+\frac{5}{6}=5\frac{5}{6}$

Find the sum.

1) $2\frac{1}{2}+1\frac{1}{3}=$

2) $6\frac{1}{2}+3\frac{1}{2}=$

3) $2\frac{3}{8}+3\frac{1}{8}=$

4) $4\frac{1}{2}+1\frac{1}{4}=$

5) $1\frac{3}{7}+1\frac{5}{14}=$

6) $6\frac{5}{12}+3\frac{3}{4}=$

7) $5\frac{1}{2}+8\frac{3}{4}=$

8) $3\frac{7}{8}+3\frac{1}{3}=$

9) $3\frac{3}{9}+7\frac{6}{11}=$

Subtract Mixed Numbers

Step-by-step guide:

Use the following steps for both adding and subtracting mixed numbers.

- ✓ Subtract the whole number of second mixed number from whole number of the first mixed number.
- ✓ Subtract the second fraction from the first one.
- ✓ Find the Least Common Denominator (LCD) if necessary.
- ✓ Add the result of whole numbers and fractions.
- ✓ Write your answer in lowest terms.

Examples:

1) Subtract. $5\frac{2}{3} - 2\frac{1}{4} =$

Rewriting our equation with parts separated, $5 + \frac{2}{3} - 2 - \frac{1}{4}$

Solving the whole number parts $5 - 2 = 3$, Solving the fraction parts, $\frac{2}{3} - \frac{1}{4} = \frac{8-3}{12} = \frac{5}{12}$

Combining the whole and fraction parts, $3 + \frac{5}{12} = 3\frac{5}{12}$

2) Subtract. $3\frac{4}{5} - 1\frac{1}{2} =$

Rewriting our equation with parts separated, $3 + \frac{4}{5} - 1 - \frac{1}{2}$

Solving the whole number parts $3 - 1 = 2$, Solving the fraction parts, $\frac{4}{5} - \frac{1}{2} = \frac{3}{10}$

Combining the whole and fraction parts, $2 + \frac{3}{10} = 2\frac{3}{10}$

Find the difference.

1) $3\frac{1}{3} - 1\frac{1}{3} =$

2) $4\frac{1}{2} - 3\frac{1}{2} =$

3) $5\frac{1}{2} - 2\frac{1}{4} =$

4) $6\frac{1}{6} - 5\frac{1}{3} =$

5) $8\frac{1}{2} - 1\frac{1}{10} =$

6) $9\frac{1}{2} - 2\frac{1}{4} =$

7) $9\frac{1}{5} - 5\frac{1}{6} =$

8) $14\frac{3}{10} - 13\frac{1}{3} =$

9) $19\frac{2}{3} - 11\frac{5}{8} =$
